

# Seasonal Changes

**Today we will be...**

Finding out how humans are affected by the seasons.

What does  
**hibernate**  
mean?

How do animals  
**adapt** for each  
season?

Animals adapt in lots of ways, some eat different foods and some even sleep through the winter. This is called hibernating.

Some lose their fur in the summer. This is called moulting and helps to keep them cool.

Do humans adapt for different seasons?

Think, pair, share your ideas.  
Don't forget to use evidence to  
support your answers.

Do we wear the  
same clothes in the  
spring, summer,  
autumn and  
winter?

Spring

Summer

Autumn

Winter

Are these people wearing the same clothes for each season?

Do we eat the same  
food in the spring,  
summer, autumn and  
winter?

Spring

Summer

Autumn

Winter

Are the fruits and vegetables ready to be harvested at the same time?

Do we have the same hobbies in the spring, summer, autumn and winter?

Would you like to do these hobbies in any season?  
Would they be safe if it was raining or icy?
