LO: I can order and improve sentences about the Venus Fly Trap

Re-write these sentences in the correct order and improve them.

the plant takes in the nutrients from the dead insect

the venus fly trap lays open waiting for an insect to come

after it has absorbed all the nutrients it opens up again, ready for its next victim

the insect struggles and the trap closes tighter

the venus fly trap produces digestive acid that kills and digests the insect

the hairs let the plant know that there is something there and it shuts

the insect walks into the trap and triggers hairs inside the plant
