

Teacher notes

Instructions:

- 1) Children will shuffle the number cards and place them face down.
- 2) Player 1 will pick a card and record the number represented in the table. Player 2 will then do the same.
- 3) Children will compare the number representation. The winner of each round is the player with the greatest number representation.

The winner is the player with the most rounds won.

DEVELOPING

Children are provided with one page of number representations and will complete the table using the terminology more than, is less than and is equal to.

SECURE

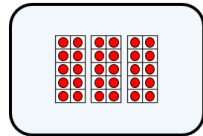

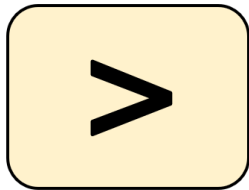

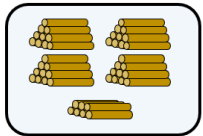

MASTERY

Children are provided with two pages of number representations and will complete the table using comparison signs $<$, $>$ and $=$.

Example:

Comparing objects within 50

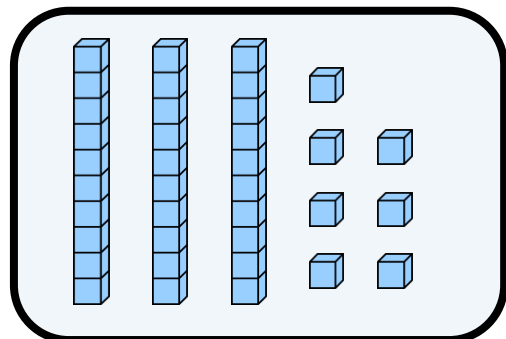

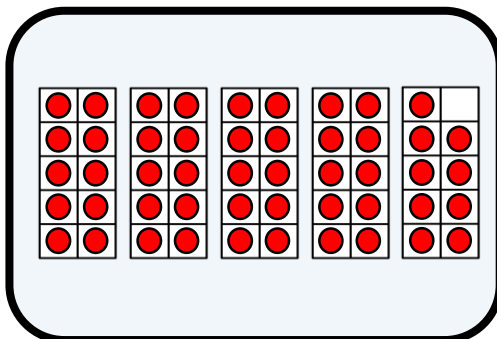

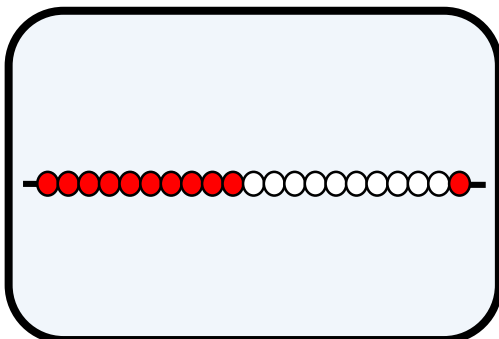

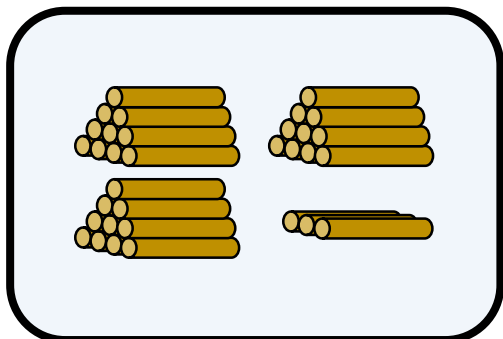

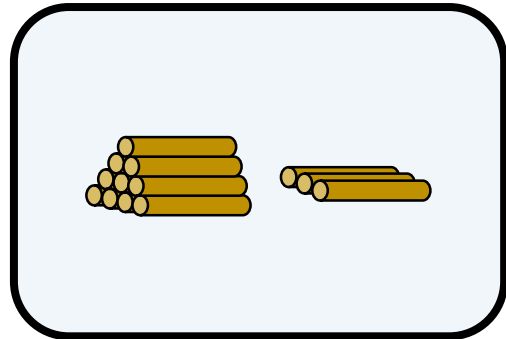

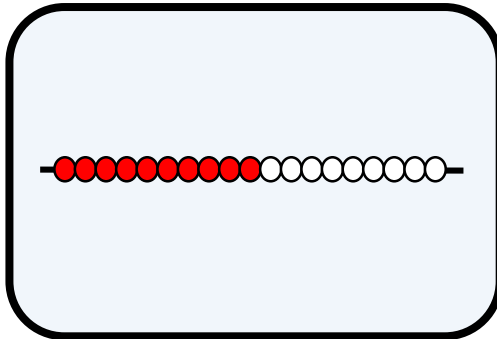

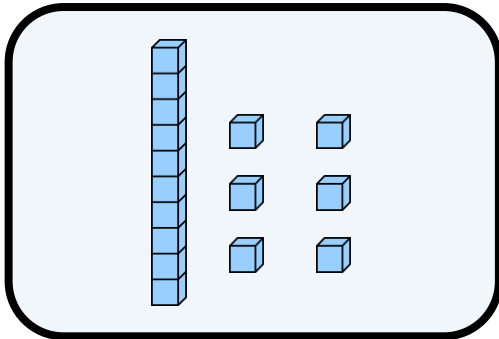

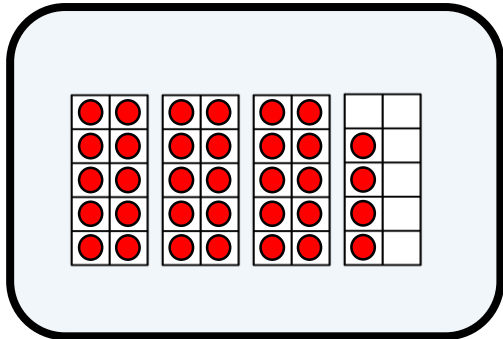

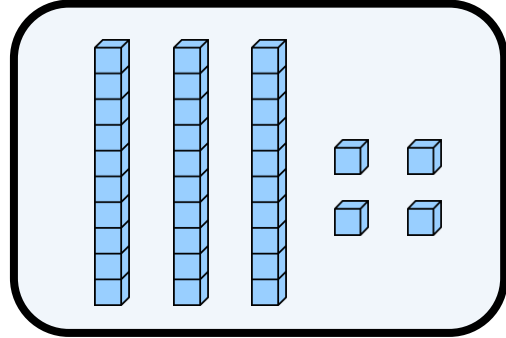

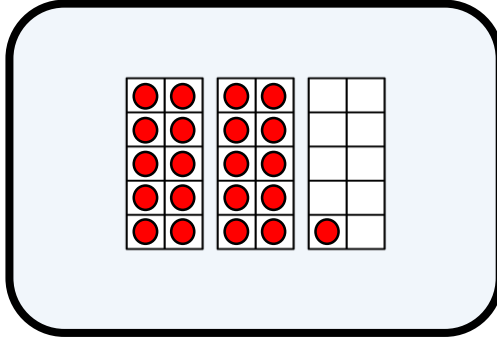

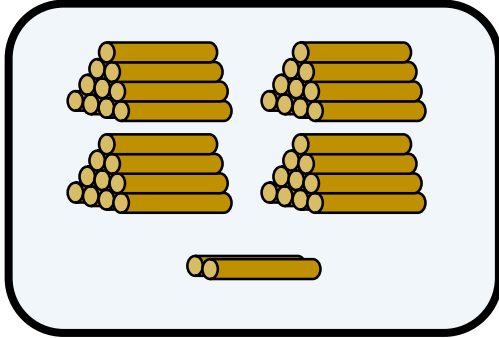

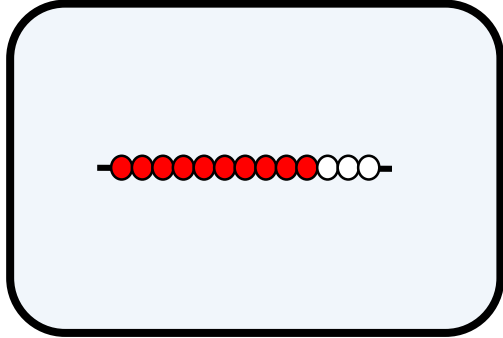

Score sheet

Player 1	$>$, $<$ or $=$	Player 2	Winner
47	$>$	30	Player 1

Comparing objects within 50

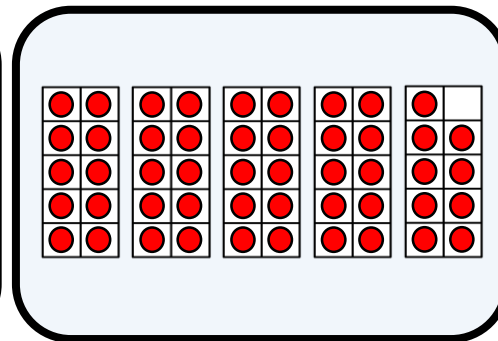

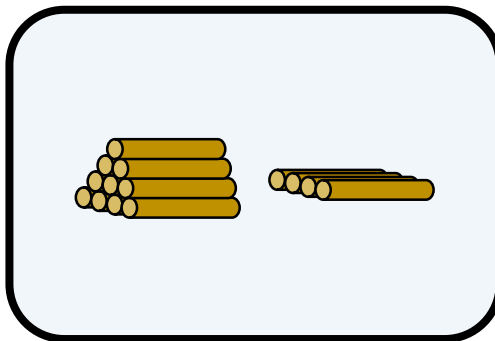

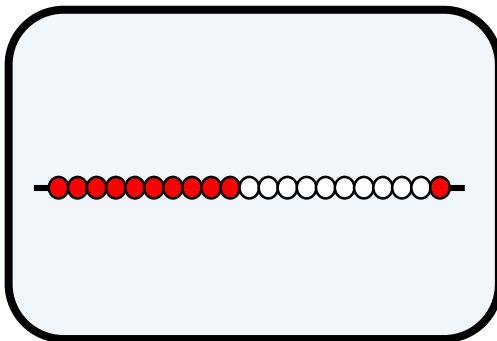

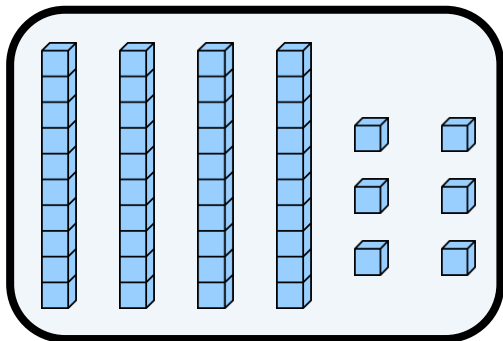

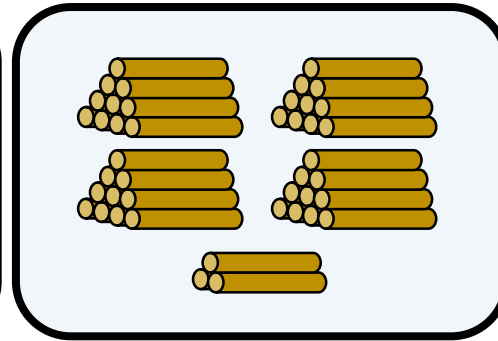

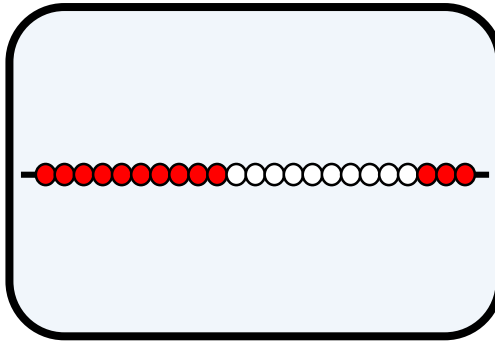

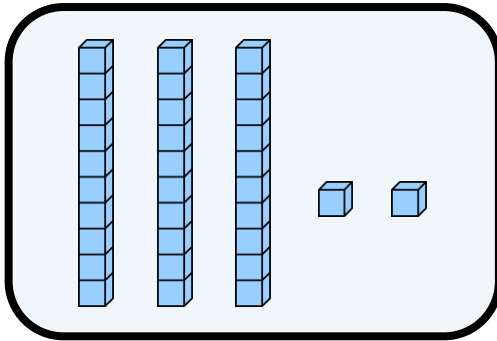

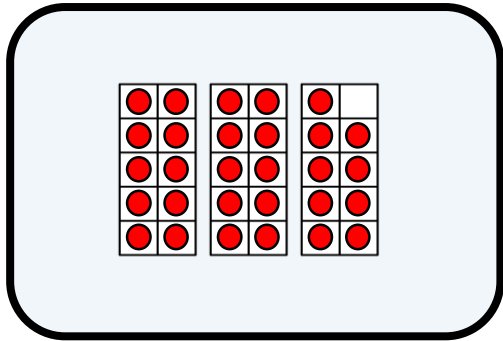

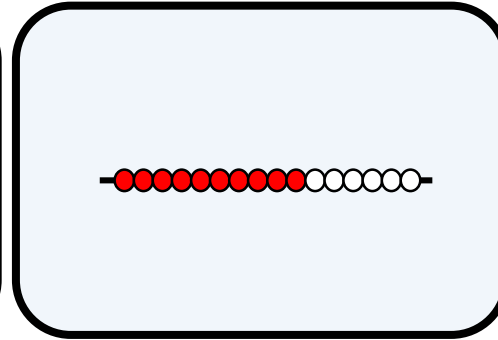

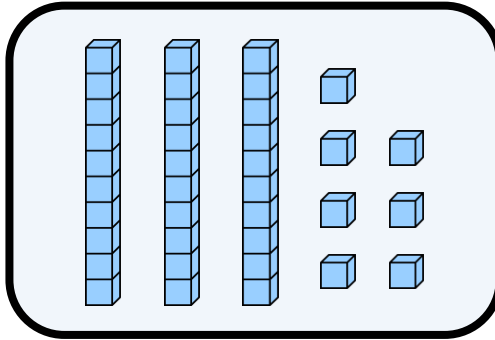

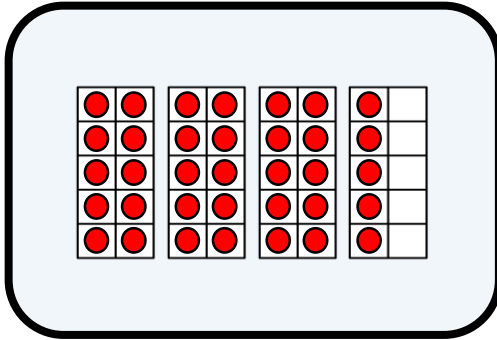

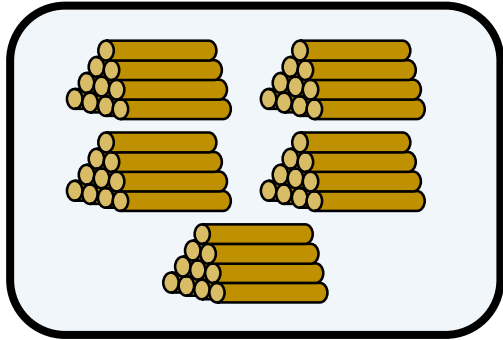

Cut out and shuffle the picture cards and place them face-down.
Pick two cards at random and compare them using the comparison signs.

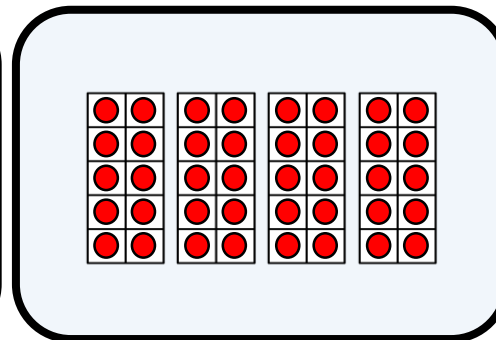

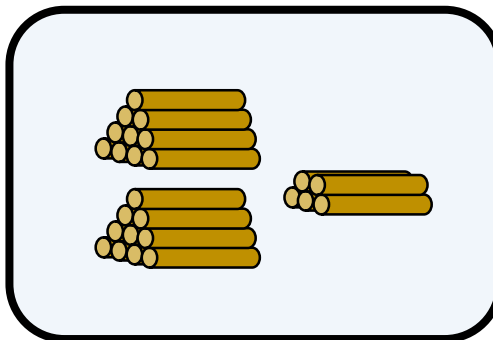

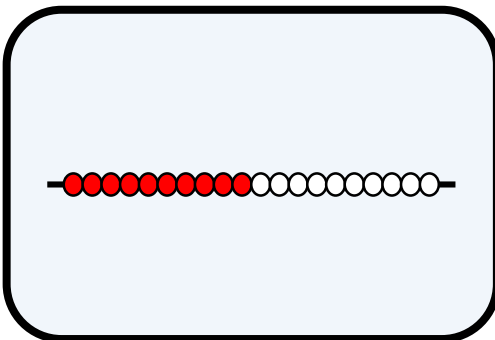

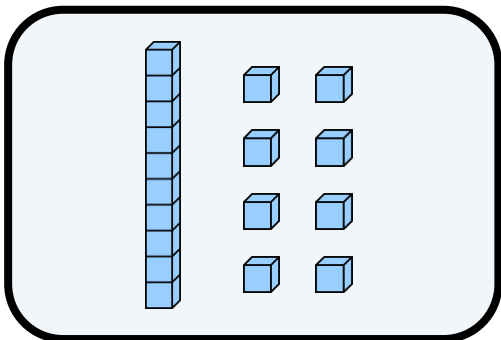

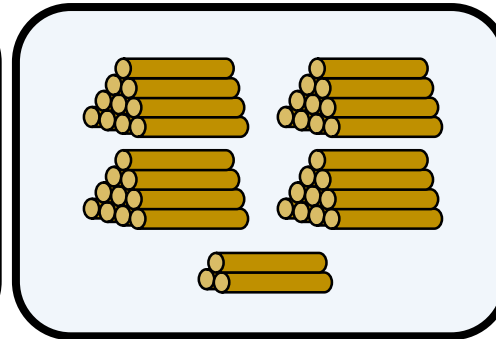

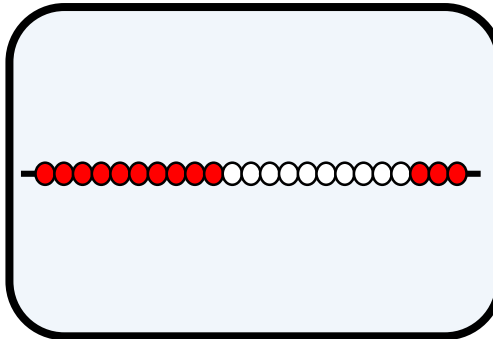

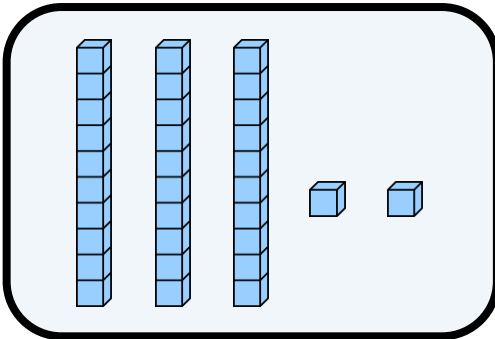

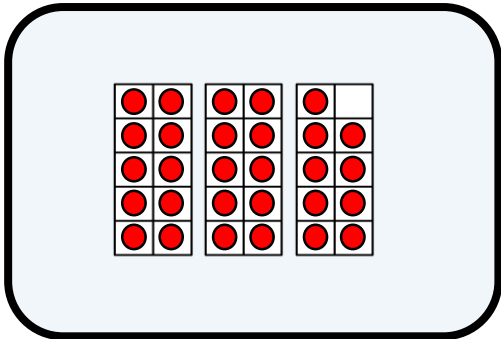

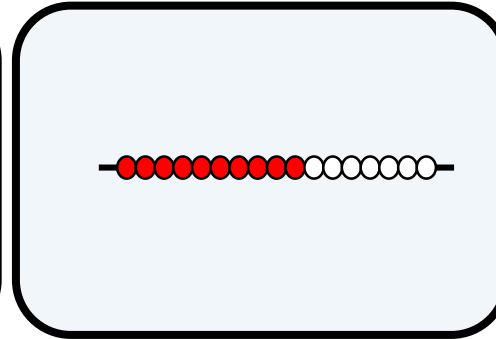

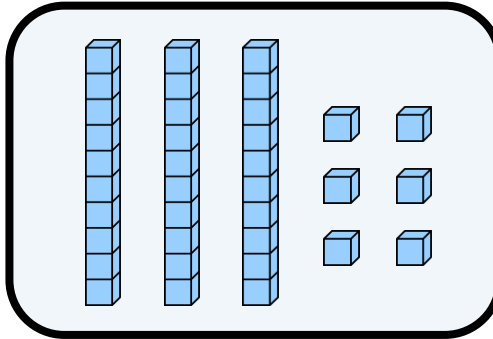

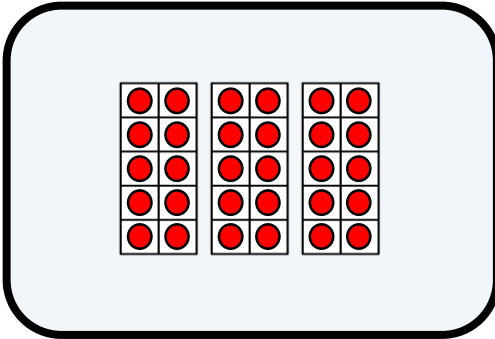

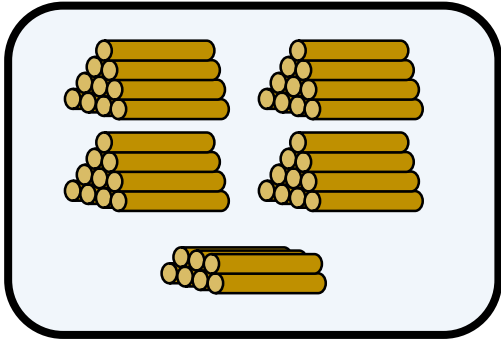

Comparing objects within 50

Cut out and shuffle the picture cards and place them face-down.
Pick two cards at random and compare them using the comparison signs.

Comparing objects within 50

Cut out and shuffle the picture cards and place them face-down.
